50X1-HUM

Sovetskaya Estoniya, 13 Jun 50

On 12 June, weather in the republic was cool, dry, and sunny with strong winds. In eastern Estonia, it was cloudy with brief local rains in places.

In the next few days, most regions will continue to have cool, sunny weather with strong winds. Night temperature will be 4-8 degrees above zero, day temperature 12-16 degrees above zero. In the future, the temperature will rise slightly; the wind will slacken and cloudiness will increase.

Sovetskaya Estoniya, 14 Jun 50

On 13 June, weather in the republic became increasingly cloudy with brief rains in the eastern and central regions. Strong northwest winds prevailed. Night temperature was 5-8 degrees above zero; noon temperature was 7 above in Narva, 8 above in Tartu, Vil'yandi, and Vyr, 9 above in Tallin, Valga, and Mustvee, 10 above in Pyarnu and Khaapsalu, and 11 degrees above on the islands.

In the next 2-3 days, weather will be cloudy, clearing intermittently. Brief rains will fall in places. The wind will gradually slacken in velocity. Night temperature will be 4-7 degrees above zero; day temperature will be 11-15 degrees above zero, followed by a gradual rise in temperature.

Sovetskaya Estoniya, 15 Jun 50

On 14 June, weather in the republic was slightly cloudy and dry with light winds. In Narva, it was cloudy and rainy. Night temperature dropped to 3-7 degrees above zero; day temperatures were higher. At noon, the temperature in Narva was 8 above, in Pyarnu 13 above, in Tallin, Khaapsalu, Tartu, and Vyr 14 above, in Vil'yandi 15 above, and in Valga 16 degrees above zero.

In the next 2-3 days, unstable weather with scattered cloud cover may be expected. The wind will be from the southwest. Night temperature will be 6-9 degrees above zero, day temperature 15-19 degrees above zero.

Sovetskaya Estoniya, 17 Jun 50

In the next few days, weather in the republic will continue to be dry with light to moderate winds. A few areas may have brief thundershowers. Night temperature will be 8-12 degrees above zero; day temperature will be 17-21 degrees above zero and 21-25 degrees above zero in southern Estonia.

Sovetskaya Estoniya, 18 Jun 50

In the next 2-3 days, weather in the republic is expected to be predominantly dry with varying cloud cover and light to moderate winds. Brief showers, possibly accompanied by thunder, will fall in places. Night temperature will be 8-13 degrees above zero; day temperature will be 17-21 degrees above zero and in southern Estonia 21-25 degrees above zero. In the morning, there will be fog in places.

Sovetskaya Estoniya, 20 Jun 50

On 19 June, weather in the republic was dry and slightly cloudy with light winds.

50X1-HUM

In the next 2-3 days, no actual changes in the weather are expected. Warm, predominantly dry weather with scattered to broken cloud cover and light to moderate winds will continue. Night temperature will be 8-13 degrees above zero; day temperature will be 17-21 degrees above and in southern Estonia 20-24 degrees above zero.

Sovetskaya Estoniya, 21 Jun 50

In the next few days, weather in the republic is expected to be unstable with varying cloud cover. There will be no precipitation. Winds from the western quarter will be light to moderate and fresh along the shoreline. Night temperature will be 8-13 degrees above zero; day temperature, 17-21 degrees above zero and in the southern regions 20-24 degrees above zero.

Sovetskaya Estoniya, 23 Jun 50

On 22 June, weather in the republic was slightly cloudy with light winds. Noon temperature was 18 degrees above zero on Saare Island, 19 degrees above in Mustvee; 20 above in Narva and on Khiyu Island, 21 degrees above in Pyarnu, 22 degrees above in Valga, Vyru, Tartu, Vil'yandi, and on Mukhu Island, 23 degrees above in Tallin, and 24 degrees above zero on Khaapsalu.

In the next few days, cloudiness is expected in some places. Brief showers will fall in some areas; thundershowers may also occur. The wind will be light to moderate, and during the day fresh along the shoreline. Night temperature will be 7-13 degrees above zero; day temperature, 20-25 degrees above zero.

Sovetskaya Estoniya, 25 Jun 50

In the next 2-3 days, weather in the republic is expected to be unstable with varying cloud cover. Night temperature will be 6-11 degrees above zero; day temperature, 17-22 degrees above zero.

Sovetskaya Estoniya, 27 Jun 50

On 26 June, weather in the republic was cloudy with rain in places. There was fog during the night. At noon the temperature in Valga and on Khiyu Island was 14 degrees above zero, 13 degrees above on Saare Island, 15 degrees above in Tallin, Khaapsalu, and Vil'yandi, and 17 degrees above zero in Tartu.

In the next few days, the weather will continue to be unstable. Winds in the western quarter will be light to moderate, at times strong along the shoreline. Night temperature will be 8-12 degrees above zero; day temperature, 16-20 degrees above zero.

Sovetskaya Estoniya, 28 Jun 50

In the next 2-3 days, the weather will continue to alternate between cloudy with rain and clear. There will be fog in some places in the morning. The wind will be light to moderate. Night temperature will be 8-12 degrees above zero; day temperature, 16-20 degrees above zero.

Sovetskaya Estoniya, 29 Jun 50

In the next few days, no actual changes in the weather are expected. Brief showers will fall in places, and the wind will be light to moderate. Night temperature will be 8-12 degrees above zero; day temperature 21 degrees above zero. There will be morning fog in some places.

Sovetskaya Estoniya, 30 Jun 50

In the next 2-3 days, cloudy weather, clearing intermittently, is to be expected. Brief showers will fall in places. The wind, primarily in the western quarter, will be light to moderate, and at times fresh along the shoreline. Night temperature will be 8-12 degrees; day temperature, 17-21 degrees. In the morning there will be fog in places.

Sovetskaya Estoniya, 6 Jul 50

On 5 July, weather in the republic was dry with varying cloud cover and light winds. In the next 2-3 days, no actual changes in the weather are expected. The weather will continue to be predominantly dry with varying cloud cover and light north winds. Night temperature will be 8-12 degrees above zero; day temperature 17-21 degrees above zero.

Sovetskaya Estoniya, 7 Jul 50

On 6 July, weather in the republic was slightly cloudy with light winds. Night temperature almost everywhere was 8-12 degrees above zero. In Vyrú and Rapla it dropped to 5 degrees above zero. Noon temperature was 17 degrees above in Narva, 18 degrees above in Tallin, Pyarnu, and Tapa, 19 degrees above in Tartu and Khasapsalu, and 20 degrees above in Valga, Vyrú, Vil'yandi, and Kuressaare.

In the next 2-3 days, warm, dry weather with scattered cloud cover and light winds will continue in the republic. Night temperature will be 8-13 degrees above zero; day temperature, 19-24 degrees above zero.

Sovetskaya Estoniya, 9 Jul 50

In the next 24 hours, weather in the republic will continue to be cloudy, clearing intermittently. Light showers will occur in some northern areas. Cloudiness will decrease in the future. Night temperature will be 8-12 degrees above zero; day temperature, 17-22 degrees above zero.

Sovetskaya Estoniya, 11 Jul 50

On 10 July, weather in the republic was predominantly dry with varying cloudiness and light to moderate winds. Night temperature dropped to 5-8 degrees above zero, and along the shoreline and on the islands to 9-11 degrees above zero. Noon temperature was 14 above in Tallin and Tartu, 15 above in Vil'yandi, Mustvee, and Kuressaare, 16 above in Vyrú and Tyuri, and 17 degrees above zero in Khasapsalu and Pyarnu.

In the next 2-3 days, the weather is expected to be predominantly dry with scattered cloud cover at night and varying cloud cover during the day. The winds will be light to moderate. The temperature will rise slightly. Night temperature will be 8-13 degrees above zero; day temperature, 18-22 degrees and in southern Estonia 21-25 degrees above zero.
